PROFESSIONAL SUMMARY

Results-driven **Salesforce** Developer with 3+ years of experience designing, building, and optimising scalable CRM solutions across Sales and Service Cloud environments. **Salesforce** Certified Administrator and Business Analyst, recognised as a Trailhead Ranger, with proven expertise in **Apex** development, **REST API integration**, batch/**asynchronous** processing, and workflow automation. Track record of improving data processing efficiency, system reliability, and business-process accuracy through hands-on development and cross-functional issue resolution. Complements **Salesforce** expertise with independent software engineering experience building a production-grade **Python** algo-trading system, reflecting strong end-to-end programming, **API integration**, and system-architecture capability.

CERTIFICATIONS

- Salesforce Certified Administrator
- Salesforce Certified Business Analyst
- Salesforce Platform Developer I (PD1) — In Progress

TECHNICAL SKILLS

- **Salesforce Administration:** Workflow & Process Automation, Flow Builder, Dashboards & Reports, User & Security Management, Data Management
- **Salesforce Development:** **Apex** (Triggers, Classes, Batch & Scheduled **Apex**, **Asynchronous** Processing), Visualforce Pages & Controllers, **SOQL/SOSL**, **REST API Integration**, Test Class Automation
- **Programming Languages:** **Apex**, JavaScript, **Python**
- **Integration & Data:** **REST APIs**, **XML**, **JSON**, third-party system **integration**
- **Tools & DevOps:** **Git**/**GitHub** (sandbox & production repositories), Gearset, FlexDeploy, IntelliJ IDEA, VS Code

PROFESSIONAL EXPERIENCE

Salesforce Developer | Tata Consultancy Services, Nagpur *Jan 2020 – Dec 2022*

- Built a **REST API integration** triggered on Opportunity records to transmit **XML** metadata to a Manufacturing Unit system in real time, increasing **80% data-processing efficiency**.
- Led resolution of a critical, high-priority production incident spanning 3 cross-functional teams and platforms, restoring full business operations within a single business day.
- Engineered an **asynchronous** batch **Apex** class to automate Quote-to-Account field updates, using optimized **SOQL** queries to aggregate and calculate data across related records.
- Customized Visualforce pages, controllers, and extensions to deliver client-specific business functionality.
- Built trigger-driven Visualforce reporting views that dynamically grouped Accounts by region and pending amount on Opportunity creation/update, improving **60% data accuracy**.
- Developed and deployed a scheduled **Apex** job for automated data cleanup and integrity checks, reducing system errors by 30% and improving overall platform performance.

PROJECTS

OnyxFlow — Algorithmic Crypto Futures Trading System — *Independent Project* | **Python, Flask, REST APIs**

- Architected a modular, production-grade algorithmic trading bot for BTC, ETH, and SOL perpetual futures, built on **Python** with a **Flask**-based real-time monitoring dashboard. With **encrypted trade logs and user data**.
- Designed a config-driven strategy engine (YAML-based, no hardcoded parameters) enabling rapid strategy iteration and safe session-level overrides without touching base configuration.
- Implemented closed-candle, strict entry-evaluation logic on a 30-minute primary timeframe to eliminate look-ahead bias and ensure trade-signal integrity.
- Built a dual-cache data architecture separating dashboard scalar values from full historical indicator data, and an **automated parity-validation suite achieving zero measurable divergence** between live and backtest outputs.
- Diagnosed and resolved a critical data-integrity defect in the entry-evaluation pipeline, restoring signal accuracy across all strategy phases.
- Currently extending the system with Delta Exchange India & Binance **REST API integration** for live multi-exchange order execution.

COVID-19 Tracker — *Personal Project*

- Built a real-time COVID-19 tracking web app displaying live case, recovery, and death statistics by country.

EDUCATION

B.E., Electronics & Telecommunications Engineering — Government College of Engineering, Raipur | 2015–2019
